# Benoît Collins

**Current Address**
Department of Mathematics
Graduate School of Science,
Kyoto University,
Kyoto 606-8502,
Japan

**Personal Data**
Born in Paris, France, December 1977
French Citizen, Permanent Resident
of Japan
married, 3 children
collins@math.kyoto-u.ac.jp
math.kyoto-u.ac.jp/~collins/

## Employment

| | | |
|---|---|---|
| **Kyoto University** | Full Professor | April 2021 – present |
| **Kyoto University** | Associate Professor | April 2014 – March 2021 |
| **University of Ottawa** | Associate Professor | July 2011 – June 2015 |
| **University of Ottawa** | Assistant Professor | January 2006 – June 2011 |
| **CNRS (université Lyon 1)** | Chargé de recherches (on leave) | October 2005 – present |
| **Kyoto University (RIMS)** | COE postdoctoral fellow | May 2005 – December 2005 |
| **Kyoto University (Math)** | JSPS postdoctoral fellow | May 2003 – May 2005 |
| **École Normale Supérieure** | AMN (part time teacher) | September 2000 – May 2003 |
| **École Normale Supérieure** | Normalien (contracted student) | September 1996 – August 2000 |

## Diplomas

| | | |
|---|---|---|
| **Thèse** (Ph.D.) | Paris 6 / ENS Paris | Jan. 2003 |
| **Magistère** (MSc) | Paris 6 / ENS Paris | July 1998 |
| **DEA** (M.Sc) | Paris 6 | July 1998 |
| **Agrégation** | ENS Paris | July 1998 |
| **Licence & Maîtrise** (B. Sc.) | Paris 11 / ENS Paris | July 1997 |
| **Baccalauréat** | Limoges | July 1994 |

## Education

| | | |
|---|---|---|
| **Thèse** (PhD) | Paris 6 | October 1999 - January 2003 |
| **Magistère** (pre-thesis) | Paris 6 | September 1998 - September 1999 |
| **DEA** (MSc) | Paris 6 | October 1997-July 1998 |
| **Licence-Maitrise** (Bsc) | Paris 11 | October 1996 - July 1997 |
| **École Normale Supérieure** | Paris Ulm | September 1996 - August 2000 |
| **CPGE** (preparatory class) | Louis-le-Grand | July 1996 - July 1998 |

## Research areas

My research interests gravitate around *Random Matrix Theory* and the applications thereof. Free Probability, Quantum Information Theory, Operator Algebras, Probability Theory, Mathematical Physics, Quantum Groups, Asymptotic representation theory, are fields that appear in my research outcome.

## Awards and Honors

2025: 2025 Frontiers of Science Award (jointly with Charles Bordenave).
2025: 2025 Commendation for Science and Technology by the Minister of Education, Culture, Sports, Science and Technology.
2024: Chaire Jean Morlet.
2023: Fall prize of the Mathematical Society of Japan.
2022: Recipient of the 19th (FY2022) JSPS Prize.
2022: Invited speaker, virtual International Congress of Mathematicians.
2013: Takebe prize.

2012: G de B Robinson award.
2010: Ontario's Early Research Award.

## Editorial Service

- 2013/4 – now: Annales Blaise Pascal (associate editor)
- 2013/8 – 2021/10: Annales Scientifiques de l'Institut Henri Poincaré B (associate editor)
- 2014/12 – 2019/12: Scientiae Mathematicae Japonicae (associate editor)
- 2015/08 – now: Journal of Mathematical Physics (associate editor)
- 2018/12 – now: Letters in Mathematical Physics (associate editor)
- 2019/12 – now: Canadian Journal of Mathematics (associate editor)
- 2021/04 – now: Kyoto Journal of Mathematics (associate editor)
- 2022/01 – now: IDAQP (associate editor)
- 2022/08 – now: Probability Theory and Related Fields (associate editor)
- 2022/12 – now: Journal of Theoretical Probability (associate editor)

## Courtesy / visiting appointments

| | | |
|---|---|---|
| **CIRM** (Marseille) | Chaire Jean Morlet | Fall 2024 |
| **ENS** (Lyon) | Visiting Professor | Fall 2024 |
| **CRM** (Montreal) | Simons CRM professor (declined) | March 2019 |
| **ENS** (Paris) | Visiting Professor | January 2018 |
| **IHP** (Paris) | Visiting Professor | Sept-Dec 2017 |
| **IHP** (Paris) | Visiting Professor (declined) | March 2017 |
| **University of Ottawa** | Adjunct Professor | July 2015 – present |
| **University of Waterloo** | Adjunct Professor | July 2015 – 2018 |
| **Tohoku University** | Visiting Professor | April 2013 – March 2014 |
| **Kyoto University** (RIMS) | Visiting Associate Professor | Oct-dec 2011 |
| **Mittag-Leffler Institute** | Visiting Professor | November 2010 |
| **Nagoya University** | Visiting Scholar | October 2010 |
| **Wroclaw University** | Marie Curie Fellow | May June 2009 |
| **The University of Tokyo** | Visiting Associate Professor | Sept 2008 – Mar 2009 |

**Selected Publications** – the following is a subjective selection of publications by importance, covering most of my research interests (one paper per research theme):

- *Random graphs, Operator Algebra, Combinatorics:* Bordenave, Collins. Eigenvalues of random lifts and polynomials of random permutation matrices, Annals of Mathematics Pages 811-875 from Volume 190 (2019), Issue 3
- *Quantum Algebra, Operator Algebras:* Brannan, Collins. Dual bases in Temperley-Lieb algebras, quantum groups, and a question of Jones, Quantum Topol. 9 (2018), no. 4, 715-748
- *Representation theory, Random Matrix Theory:* Collins, Novak, Śniady. Semiclassical asymptotics of $GL_N(\mathbb{C})$ tensor products and quantum random matrices, Sel. Math. New Ser. **24** (2018), no. 3, 2571-2623
- *Quantum Information Theory, Probability theory, Free probability theory:* Belinschi, Collins, Nechita. Eigenvectors and eigenvalues in a random subspace of a tensor product, Invent. Math. 190 (2012), no. 3, 647-697
- *Random Matrix Theory, Free probability theory:* Collins, Male. The strong asymptotic freeness of Haar and deterministic matrices Ann. Sci. Éc. Norm. Supér. (4) 47 (2014), no. 1, 147-163
- *Operator Theory, Intersection theory:* Bercovici, Collins, Dykema, Li, Timotin. Intersections of Schubert varieties and eigenvalue inequalities in an arbitrary finite factor, J. Funct. Anal. 258 (2010), no. 5, 1579-1627
- *Quantum groups, integrable systems:* Banica, Collins, Zinn-Justin. Spectral analysis of the free orthogonal matrix, Int. Math. Res. Not. IMRN 2009, no. 17, 3286-3309

- *Quantum groups, homology:* Collins, Härtel, Thom. Homology of free quantum groups C. R. Math. Acad. Sci. Paris 347 (2009), no. 5-6, 271-276
- *Matrix Integrals, Mathematical physics, combinatorics:* Collins, Guionnet, Maurel-Segala. Asymptotics of unitary and orthogonal matrix integrals, Adv. Math. 222 (2009), no. 1, 172-215
- *Random Matrix Theory, Weingarten calculus:* Collins. Moments and cumulants of polynomial random variables on unitary groups, the Itzykson-Zuber integral, and free probability Int. Math. Res. Not. 2003, no. 17, 953-982

**Bibliometrics**

Mathscinet data (August 2026): 96 published papers, 1702 citations
Google scholar data (October 2026): Citations, 5724, h-index 34

## Submitted preprints

**Collins**: *The Failure of Simultaneous Quantum Typicality*, arXiv:2609.25726.
**Collins, Yamagishi**: *A Sudakov–Fernique proof of Lehner-type edge bounds for matrix-valued GUE sums*, arXiv:2606.21137.
**Collins, Nagatsu**: *Smooth Multi-Trace Statistics of Classical Ensembles: Large N Expansions, Cumulants, and Matrix Integrals*, arXiv:2602.04614.
**Lamrani, Collins, Bouchaud**: *Holdout cross-validation for large non-Gaussian covariance matrix estimation using Weingarten calculus*, arXiv:2509.13923.
**Collins, Gurau, Lionni**: *Free cumulants and freeness for unitarily invariant random tensors*, arXiv:2410.00908.
**Bordenave, Collins**: *Norm of matrix-valued polynomials in random unitaries and permutations*, arXiv:2304.05714.

## Accepted Publications (complete list)

(1) **Chen, Collins**: *The complexity of semidefinite programs for testing $k$-block-positivity*, accepted for publication in Journal of Mathematical Physics.
(2) **Collins, Matsumoto**: *Weingarten calculus with virtual isometries*, SIGMA (2026) **22**, 077, 23 pages.
(3) **Hayase, Collins, Inoue**: *Free Random Projection for In-Context Reinforcement Learning*, arXiv:2504.06983 ( Accepted for a Poster presentation in AISTATS 2026).
(4) **Hayase, Collins, Karakida**: *Gaussian Equivalence for Self-Attention: Asymptotic Spectral Analysis of Attention Matrix*, arXiv:2510.06685 (accepted for an oral presentation in AISTATS 2026).
(5) **Collins, Nagatsu**: *Weingarten calculus for centered random permutation matrices*, Algebraic Combinatorics, **9** (2026) no. 2, 465–479.
(6) **Chen, Collins, Fawzi**: *Symmetry reduction for testing $k$-block-positivity via extendibility*, Journal of Physics A: Mathematical and Theoretical, (2025) **58**, no. 48: 485302.
(7) **Collins, Miyagawa**: *Operator-valued Khintchine inequality for $\varepsilon$-free semicircles*, Bulletin of the London Mathematical Society, (2026), **58**, No. e70229, 13.
(8) **Collins, Yuan**: *Strong convergence for tensor GUE random matrices*, Bernoulli (2026) **32**, no. 3, 1812–1826.
(9) **Collins, Fujie, Hasebe, Leid, Sakuma**: *Fluctuations of eigenvalues of a polynomial on Haar unitary and finite rank matrices*, Mathematical Physics, Analysis and Geometry, (2025) **28**, No. 28, 21.
(10) **Collins, Giordano, Sato**: *Variations on quantum de Finetti theorems and operator valued Martin boundaries: a Choquet–Deny approach*, Proceedings of the American Mathematical Society, (2026) **154**, 1233–1249.
(11) **Collins, Leid, Sakuma**: *Matrix models for cyclic monotone and monotone independences*, Electron. Commun. Probab. (2024) **29**, 1-–14 .
(12) **Bordenave, Collins**: *Strong asymptotic freeness for independent uniform variables on compact groups associated to non-trivial representations*, Inventiones mathematicae (2024) **237**, no. 1, 221-–273.
(13) **Collins**: *Moment methods on compact groups: Weingarten calculus and its applications*, International Congress of Mathematicians Vol.4. Sections 5-8 (2023) 3142-–3164.
(14) **Collins, Gurau, Lionni**: *The tensor Harish–Chandra–Itzykson–Zuber integral II: detecting entanglement in large quantum systems*, Communications in Mathematical Physics (2023) **401**, 669-–716.
(15) **Collins, Metcalfe**: *Gelfand-Tsetlin polytopes and random contractions away from the limiting shapes*, Annales de la Faculté des sciences de Toulouse: Mathématiques, Serie 6, Volume **32** (2023) no. 3, pp. 423-533.
(16) **Collins, McSwiggen**: *Projections of Orbital Measures and Quantum Marginal Problems*, Transactions of the American Mathematical Society (2023) **376**, 5601–5640.
(17) **Collins, Yin, Zhao, Zhong**: *The spectrum of local random Hamiltonians*, Journal of Physics A: Mathematical and Theoretical (2023) **56**, no. 3: 035201.
(18) **Collins, Gaudreau Lamarre, Male**: *Asymptotic Freeness of Unitary Matrices in Tensor Product Spaces for Invariant States*, Random Matrices: Theory and Applications (2023) **12**, no. 02: 2250052.
(19) **Collins, Gurau, Lionni**: *The tensor Harish-Chandra-Itzykson-Zuber integral I: Weingarten calculus and a generalization of monotone Hurwitz numbers*, Journal of the European Mathematical Society (2024) **26**, no. 5, 1851–1897.

(20) **Collins, Mai, Miyagawa, Parraud, Yin**: *Convergence for noncommutative rational functions evaluated in random matrices*, Mathematische Annalen (2024) **388**, no. 1, 543–574.
(21) **Collins, Parraud**: *Concentration estimates for random subspaces of a tensor product, and application to Quantum Information Theory*, Journal of Mathematical Physics (2022) **63**, no. 10, 102202.
(22) **Cadilhac, Collins**: *A metric characterization of freeness*, Journal of Functional Analysis (2022) **283**, no. 5, 109562.
(23) **Cleve, Collins, Liu, Paulsen**: *Constant gap between conventional strategies and those based on C*-dynamics for self-embezzlement*, Quantum (2022) **6**, 755.
(24) **Collins, Yao, Yuan**: *On spectral distribution of sample covariance matrices from large dimensional and large $k$-fold tensor products*, Electronic Journal of Probability (2022) **27**, 1-18.
(25) **Collins, Youn**: *Additivity violation of the regularized Minimum Output Entropy*, Documenta Mathematica (2022) **27**, 1299–1320.
(26) **Collins, Hayase**: *Asymptotic Freeness of Layerwise Jacobians Caused by Invariance of Multilayer Perceptron: The Haar Orthogonal Case*, Communications in Mathematical Physics (2023) **397**, no. 1, 85–109.
(27) **Collins, Matsumoto, Novak**: *The Weingarten Calculus*, NOTICES OF THE AMERICAN MATHEMATICAL SOCIETY (2022) **69**, no. 5.
(28) **Collins, Guionnet, Parraud**: *On the operator norm of non-commutative polynomials in deterministic matrices and iid GUE matrices*, Cambridge Journal of Mathematics Volume 10, Number 1, 195–260, 2022.
(29) **Charlesworth, Collins**: *Matrix models for $\varepsilon$-free independence*, Archiv der Mathematik **116** (2021), no. 5: 585-600.
(30) **Collins, Kumari, Pestov**: *Universal consistency of the $k$-NN rule in metric spaces and Nagata dimension*, ESAIM: Probability and Statistics **24** (2020), 914–934.
(31) **Bardet, Collins, Sapra**: *Characterization of equivariant maps and application to entanglement detection*, Annales Henri Poincaré **21** (2020), no. 10, 3385–3406.
(32) **Brannan, Collins, Lee, Youn**: *Temperley-Lieb quantum channels*, Communications in Mathematical Physics **376** (2020), no. 2, 795–839.

## Other Manuscripts

**Cioppa, Collins**: *Matrix Units in the Symmetric Group Algebra, and Unitary Integration*, arXiv:1307.4766.
**Collins, McDonald, Saad**: *Compound Wishart Matrices and Noisy Covariance Matrices: Risk Underestimation*, arXiv:1306.5510.

**Collins, Śniady**: *Asymptotic fluctuations of representations of the unitary groups*, arXiv:0911.5546.

**Funding** (unless specified otherwise, I am the PI or sole investigator):

- 2025-2029: KIBAN A JSPS grant 25H00593 "New Developments in Random Matrix Theory: Perspectives from Free Probability Theory, Non-commutative Analysis, and PDEs": *46,020,000 JPY*.
- 2023-2027: Kaitaku JSPS grant 23K17299 "Non backtracking operators and its applications": *25,740,000 JPY*.
- 2023-2025: International collaborative JSPS grant 23KK0050 "Macroscopic properties of discrete stochastic models and analysis of their scaling limits" (PI: Takashi Kumagai; I am a co-investigator): *21,060,000 JPY*.
- 2021-2024: KIBAN B JSPS grant 21H00987 "Random Matrix Theory: Free Probability Theory and beyond": *14,950,000 JPY*.
- 2020-2022: Houga JSPS grant 20K20882 "Behavior of Large random tensors and related topics": *6,110,000 JPY*.
- 2019-2020 NSERC New Frontiers in Research Fund "Algebraic Techniques for Quantum Security" (PI: Anne Broadbent): *250,000 CAD*.
- 2018: Simons CRM funding, to organize a one month "Free Probability" program at CRM in march 2019 (Co-PI: James Mingo, Roland Speicher, Dan Voiculescu): *40,000 USD*.
- 2018: CRM funding, to organize a one month "Free Probability" program at CRM in march 2019 (Co-PI: James Mingo, Roland Speicher, Dan Voiculescu): *30,000 CAD*.
- 2017: IHP funding, to organize a 3 months "Analysis and Quantum Information" program during the fall 2017 (Co-PI: Guillaume Aubrun, Ion Nechita, Staszek Szarek): *130,000 EUR*.
- 2017: Houga JSPS grant 17K18734 "Applications of Quantum Groups and Representation Theory to Quantum Information Theory": *6,370,000 JPY*.
- 2017: Wakate A JSPS grant 17H04823 "Random Matrix Theory and applications to Quantum Information Theory": *24,050,000 JPY*.
- 2016: International collaborative JSPS grant 15KK0162 "Random Matrix Theory and its applications": *13,260,000 JPY*.
- 2015: NSERC Discovery accelerator supplement "Free Probability, Random Matrices and Quantum Information": *160,000 CAD*.
- 2015: NSERC Discovery grant "Free Probability, Random Matrices and Quantum Information": *155,000 CAD*.
- 2014: Wakate B JSPS grant 26800048 "Random Matrix Theory and its applications": *3,300,000 JPY*.
- 2014: Kyoto University internal fund JSPS: *1,000,000 JPY*.
- 2014: ANR StoQ ANR-14-CE25-0003 "Stochastic Methods in Quantum Mechanics" (PI: Stéphane Attal): *386,022 EUR*.
- 2013: Junior PI at AIMR, Sendai: *5,000,000 JPY*.
- 2010: Ontario's Early Research Award ER09-06-172 "Random Matrices and their applications to Quantum Information Theory": *150,000 CAD*.
- 2010: NSERC Discovery grant "Applications of random matrix theory to quantum information theory and operators algebras": *100,000 CAD*.
- 2008: ANR GRANMA ANR-08-BLAN-0311 "Grandes matrices aléatoires"(PI: A. Guionnet): *340,000 EUR*.
- 2007: ANR GALOISINT ANR-07-BLAN-0229 "Groupes quantiques : techniques galoisiennes et d'integration" (PI: J. Bichon): *154,000 EUR*.
- 2007: NSERC Discovery grant "Applications of random matrix theory to probabilistic aspects of operator algebras": *60,000 CAD*.
- 2006: University of Ottawa startup grant: *25,000 CAD*.
- 2005: COE research grant, Kyoto RIMS: *600,000 JPY*.
- 2003: JSPS research grant-in-aid (PI: Masaki Izumi; I am a co-investigator): *1,200,000 JPY*.
- 2000: MSRI/DMA grant to visit MSRI during 2 months (host: Dan Voiculescu): *10,000 USD*.

## Invited Talks

The list below contains only information about my invited talks (seminar, conferences, colloquium). Local activity, informal and contributed talks are not displayed.

(1) **October 8, 2026** *New and old results around the strong convergence of random matrices*. - Department Colloquium - Seoul National University, Korea
(2) **October 7, 2026** *Itzykson Zuber integrals for tensors*. - Probability Research Seminar - Seoul National University, Korea
(3) **September 10, 2026** *Itzykson Zuber integrals for tensors*. - Recent Developments in Operator Algebras (RIMS Joint Research) - RIMS, Kyoto University, Japan
(4) **August 21, 2026** *Operator Norm Estimates of Lehner-type for GUEs via Concentration of Measure*. - RMTA China Online Seminar, joint session with the TMRC workshop *Frontiers in Random Matrix Theory and Applications* - Kunming, China (online)
(5) **June 10, 2026** *Operator Norm Estimates of Lehner-type for GUEs via Concentration of Measure*. - Random Matrices (Oberwolfach Workshop 2624) - Mathematisches Forschungsinstitut Oberwolfach, Germany
(6) **May 18, 2026** *Smooth Multi-Trace Statistics of Classical Ensembles: Large N Expansions, Cumulants, and Matrix Integrals*. - Probability Seminar - Peking University, China
(7) **March 25, 2026** *Old and new results around the minimum output entropy*. - Entropy and Random Matrices - CIRM Marseille, France
(8) **March 15, 2026** *Uniform operator norm estimates for tensor random matrices*. - Workshop on Random Matrices, Random Fields, and Related Topics - Kagoshima University, Kagoshima, Japan
(9) **February 10, 2026** *Smooth Multi-Trace Statistics of Classical Ensembles: Large N Expansions, Cumulants, and Matrix Integrals*. - Probability Seminar - Princeton University, US
(10) **November 18, 2025** *Weingarten calculus: recent developments*. - Randomness, Invariants, and Complexity - Simons Institute (UC Berkeley), US
(11) **October 15, 2025** *Weingarten Calculus with Virtual Permutations*. - NCTS-AS Workshop on Free Probability Theory and Random Matrix Theory - National Center for Theoretical Sciences, Taiwan (online)
(12) **October 9, 2025** *Operator norm estimates for crossing matrix variants of conditional cumulants*. - Non-Commutative Probability and Related Topics 2025 - Kyushu University, Fukuoka, Japan
(13) **July 18, 2025** *On the norm of random matrices with a tensor structure*. - SPA 2025 44th Conference on Stochastic Processes and their Applications 14-18 July 2025 - Wrocław University of Science and Technology, Poland
(14) **June 26, 2025** *Around the norm of generators of the sum of epsilon-free elements and their matrix models*. - 2025 RIMS symposium: Mathematical aspects of quantum fields and related topics - RIMS, Kyoto
(15) **May 29, 2025** *Around the norm of the sum of epsilon-free elements and their matrix models*. - Conference on Free Probability on the occasion of Roland Speicher's 65th birthday - Saarland University, Germany (online)
(16) **2 April 2025** *Free probability and its applications to quantum information theory*. - High Energy Theory Seminars - online
(17) **28 March 2025** *Around the norm of generators of the sum of epsilon-free elements and their matrix models*. - Non-commutative probability, random matrices and Lévy processes - The Institute of Statistical Mathematics (ISM), Japan
(18) **24 February 2025** *Operator norm estimates for sums of tensor-valued random Haar unitaries*. - Free Entropy Theory and Random Matrices - IPAM, Los Angeles
(19) **6 December 2024** *Estimées de norme pour des matrices aléatoires*. - Colloquium Mathématique - IRMA Université de Strasbourg, France
(20) **25 November 2024** *Operator-Valued Martin Boundaries and Their Connections to Quantum Information Theory*. - Probabilistic Operator Algebras Seminar (POAS) - online
(21) **12 November 2024** *Around the operator norm of random matrices*. - Colloquium de Mathématiques de Marseille - I2M St Charles, France
(22) **7 November 2024** *Estimées de norme pour des matrices aléatoires*. - Colloquium -Institut de Mathématiques de Bourgogne - IMB, France

(23) **26 September 2024** *Eigenvalues of Non-Commuting Polynomials involving Small and Large Rank Matrices and Their Fluctuations*. - Séminaire de Probabilités commun ICJ/UMPA - ENS de Lyon, France
(24) **25 September 2024** *Random matrices, representation theory and quantum*. - Indo-French Seminar on Quantum Natural Language Processing, Theory, Applications and Prospects - CIRM, France (online)
(25) **20 September 2024** *Le Calcul de Weingarten pour les Groupes Compacts*. - Colloquium de Mathématiques de Marseille - FRUMAM St Charles, France
(26) **16 September 2024** *Les théorèmes de Wick et de Wigner*. - Théminaire - ENS de Lyon, France
(27) **23 January 2024** *Random Matrices and Free Probability*. - 2024 TMS Annual Meeting - National Chengchi University, Taiwan (online)
(28) **10 January 2024** *Lectures on Free Probability for Quantum Information Theory*. - Quantum Information Theory and Free Probability - New York University Abu Dhabi, UAE
(29) **20 December 2023** *Extensions of quantum de Finetti theorems and operator valued Martin Boundaries*. - ancg : Noncommutative analysis on groups and quantum groups - University of Franche-Comté, France
(30) **19 October 2023** *Random Matrix Theory (a moment point of view)*. - Connections Workshop: Stochastic Processes and Related Fields - Kyoto University, Japan
(31) **21 September 2023** *Random Matrices and Free Probability*. - MSJ Autumn Meeting 2023 - Tohoku University, Japan
(32) **5 September 2023** *On the norm of random matrices with a tensor structure*. - Stochastic Processes and Related Fields - Kyoto University, Japan
(33) **30 August 2023** *On the norm of random matrices with a tensor structure*. - Workshop on random matrix theory and high dimensional statistics for complex system - University of Luxembourg, Luxembourg
(34) **26 July 2023** *On the operator norm of random tensors*. - Operator Algebras and Mathematical Physics - the University of Tokyo, Japan
(35) **25 April 2023** *Around the joint behaviour of independent random tensor matrices*. - Non-commutative Geometry meets Topological Recursion - University of Vienna, Austria
(36) **25 January 2023** *The operator norm of random matrices*. - 5th Bangkok workshop on Discrete Geometry, Dynamics and Statistics - Chulalongkorn University, Thailand
(37) **19 December 2022** *New results around the norm of random matrices and operator-valued non-backtracking theory*. - Geneva MP seminar - Geneva, Switzerland
(38) **7 November 2022** *$\varepsilon$ freeness and quantum physics*. - Non-Commutative Probability and Related Topics 2022 - Hokkaido University, Japan
(39) **18 October 2022** *Title: convergence of the spectrum of random matrices in the context of rational fractions* - UCSD seminar – Online
(40) **12 October 2022** *Matrix integrals in a tensor setup*. - Bielefeld - Melbourne Zufallsmatrizen – Online
(41) **28 September 2022** *Properties of random tensor matrices with some applications to Quantum Information Theory*. - Functional Analysis Seminar - Institute for Advanced Study in Mathematics of HIT, Harbin, China – online
(42) **9 September 2022** *Matrix models for cyclic monotone and monotone independences*. - SIMA 2022 - CIMAT, Guanajuato, México.
(43) **17 June 2022** *Centered Weingarten calculus and centered Wick calculus* - Fields Workshop on Noncommutative Geometry, Free Probability Theory and Random Matrix Theory (online).
(44) **1 June 2022** *Strong convergence* - Northwestern Nemmers conference.
(45) **14 March 2022** *Strong convergence for random tensors* - CIRM – conference on random tensors (online).
(46) **09 March 2022** *An overview of Random Matrix Theory and its applications* - FoPM Seminar Tokyo U (online).
(47) **31 January 2022** *A metric characterization of freeness*. seminar - QGS: Quantum Groups Seminar (online).
(48) **13 December 2021** *An introduction to Weingarten calculus*. seminar - the group of theoretical physics in Krakow - Poland (online).

(49) **28 September 2021** *A metric characterization of freeness*. Recent Developments in Operator Algebras - RIMS - Kyoto (online).
(50) **27 August 2021** *On the norm convergence of multi matrix random matrix models*. International Workshop on Operator Theory and its Applications - Lancaster University (online).
(51) **4 August 2021** *On the operator norm of tensors*. Structured Random Matrices in Down Under: New Developments and Applications - MATRIX - Melbourne (online).
(52) **1 July 2021** *Weingarten calculus for tensors*. Tensors and applications - Sakura project: Random matrices and tensors for quantum information and machine learning - online.
(53) **29 March 2021** *Matrix models for non-commutative rational functions*. Global NCG Seminar - online.
(54) **17 March 2021** *A metric characterization of freeness*. Operator Algebras and Operator Theory Seminar - Seoul National University (online).
(55) **15 March 2021** *On the operator norm of random matrices*. MSJ Spring Meeting 2021: Statistics and Probability - Keio University - Tokyo (online).
(56) **17 February 2021** *Generalized strong convergence iid random unitaries*. Functional Analysis Seminar - UCLA (online).
(57) **10 February 2021** *Matrix integrals in a tensor setup*. *NEW DATES* OIST Workshop "Quantum Math, Singularities and Applications" - Okinawa (online).
(58) **13 January 2021** *Weingarten calculus in a tensor setup*. TENSOR JOURNAL CLUB virtual - online.
(59) **3 December 2020** *Generalized strong asymptotic freeness*. Tokyo-Kyoto Joint Online Operator Algebra Seminars.
(60) **15 October 2020** *Regularized quantities for quantum channels involving free groups*. Entangling Noncommutative Functional Analysis and Geometry of Banach Spaces - CIRM - Marseille (online).
(61) **9 September 2020** *Tensor powers of linear maps and applications to quantum information*. Recent Developments in Operator Algebras - RIMS - Kyoto (online).
(62) **20 November 2019** *Strong asymptotic freeness for random tensors of unitaries*. Probability seminar - Princeton.
(63) **15 November 2019** *Strong asymptotic freeness for random tensors of unitaries*. Probability and Mathematical Physics Seminar - NYU.
(64) **31 October 2019** *Regularized minimum output entropy and generalized Haagerup inequalities*. - Colloquium - Kaohsiung.
(65) **30 October 2019** *Norm estimates for polynomials in random permutations*. - Probability seminar - Academia Sinica - Taipei.
(66) **22 October 2019** *Strong convergence for random permutations*. - Colloquium - Melbourne.
(67) **2–6 September 2019** *Strong convergence for random permutations and random tensors*. - Japanese-German Open Conference on Stochastic Analysis - Fukuoka.
(68) **22 August 2019** *Random Matrix Techniques in Quantum Information Theory*. - WPI 2019 - Hong Kong.
(69) **14 June 2019** *Infinite dimensional quantum channels and free probability*. - Workshop on Developments and Technical Aspects of Free Noncommutative Functions - Fields - Toronto.
(70) **2 June 2019** *Equivariance and application to entanglement detection*. - Interactions between Noncommutative Analysis and Quantum Information Theory - Harbin.
(71) **9 May 2019** *Strong Asymptotic Freeness for Random Permutations and Random Tensors*. - NYUS - Shanghai.
(72) **March 2019** *Strong convergence for random tensors*. Probability seminar - Berkeley.
(73) **15 February 2019** *Equivariance and application to entanglement detection*. - SITP - Stanford.
(74) **25 January 2019** *PPT and PPT2*. - 3rd Bangkok workshop on Discrete Geometry Dynamics and Statistics - Bangkok.
(75) **7 November 2018** *PPT and PPT2*. - Nagoya international workshop on the Physics and Mathematics of Discrete Geometries - Nagoya.
(76) **2 November 2018** *norm estimate for polynomials in unitary random tensors*. - OIST Mini Symposium "Holographic Tensors" - Okinawa.
(77) **summer 2018** *On Alon's generalized second eigenvalue conjecture*. - colloquium - uOttawa.
(78) **23 March 2018** *Strong convergence for random permutations*. - Hong Kong Probability Seminar - HKUST - Hong Kong.

(79) **16 January 2018** *calcul de Weingarten classique et quantique*. - colloque - Caen.
(80) **January 2018** *strong convergence for random permutations*. Functional analysis seminar - Paris 6.
(81) **December 2017** *strong convergence for random permutations*. Probability seminar - Orsay.
(82) **3 April 2017** *Asymptotics of $GL_N(\mathbb{C})$ tensor products and quantum random matrices*. - ProbabLY ON Random Matrices - ENS - Lyon.
(83) **20–24 February 2017** . - Asymptotic Representation Theory - IHP - Paris.
(84) **3 February 2017** *Highly entangled spaces through non random methods*. - Operator Algebras and Quantum Information Theory - RIMS - Kyoto.
(85) **21 November 2016** *Norm convergence for random unitary multimatrix models and Quantum Information Theory*. - GMS - Luxembourg.
(86) **19 November 2016** . - Saarebruecken.
(87) **16 November 2016** *Norm convergence for random unitary multimatrix models and Quantum Information Theory*. - Seminar in Applied Mathematics - HKUST - Hong Kong.
(88) **26 August 2016** *Operator norm convergence for the unitary Brownian motion*. - Random Product Matrices - Bielefeld.
(89) **12 August 2016** *Coefficients of the basis elements dual to the Temperley-Lieb basis and Weingarten calculus on $O_n^+$*. - Operator Algebras and Mathematical Physics - MSJ-SI - Sendai.
(90) **20 July 2016** *Free probability for quantum computation*. - Stochastic Methods in Quantum Mechanics - ANR - Autrans.
(91) **23 March 2016** *Free probability for random matrices with purely discrete eigenvalues*. - Free Probability and the Large N Limit, V - university of California - Berkeley.
(92) **24 March 2016** *Applications of the Haagerup's inequality and strong convergence of random matrices to quantum information theory*. - SITP - Stanford.
(93) **February 2016** . - Paris.
(94) **August 2015** . - Tokyo.
(95) **14 July 2015** *De Finetti theorems in quantum information theory, separable states, and (quantum) group symmetries*. - Quantum Groups and Quantum Information Theory - Herstmonceux (UK).
(96) **9 June 2015** *$k$-positive maps*. - MFO free probability - Oberwolfach.
(97) **10 March 2015** *Unitary Valued Brownian Motion*. - Queen's free probability seminar - Kingston.
(98) **9 January 2015** *Random positive maps*. - Random matrices and their applications - ROCORE - Hong Kong.
(99) **8 December 2014** *Weingarten calculus and applications*. - Winter School - Besancon / Metabief.
(100) **25 September 2014** *Random positive maps*. - Colloquium - Kolkata (India).
(101) **10 September 2014** *Random positive maps*. - Recent Developments in Operator Algebras - RIMS - Kyoto.
(102) **17 July 2014** *Random tensors and asymptotic freeness*. - ESI - Vienna.
(103) **29 April 2014** *MOE additivity violation via free probability theory*. - Colloquio sul - Florianopolis (Brazil).
(104) **22 April 2014** *Describing exchangeable SU(n) invariant separable states*. - Kyoto Operator algebra seminar - Kyoto.
(105) **15 February 2014** *Numerical range for random matrices*. - Queen's Free probability seminar - Kingston.
(106) **21 December 2013** *Numerical range for random matrices*. - Kansai Operator Algebras Seminar - Kinosaki.
(107) **6–9 December 2013** *Matrix Theory in Quantum Information*. - CMS Winter Meeting - Ottawa.
(108) **21 November 2013** *Violation of the MOE additivity via free probability*. - Operator Algebra seminar - Seoul National University.
(109) **13 November 2013** *Free probability and QIT*. - colloquium - Kyoto math department.
(110) **12 November 2013** *Free probability and QIT*. - colloquium - AIMR, Tohoku math dept.
(111) **3–10 November 2013** . - Discrete Mathematics & its Applications - JSP-DST seminar - Tokyo.
(112) **25 October 2013** *Quantum channels and free probability*. - JSP-DST seminar - Tokyo (Japan).
(113) **15 October 2013** *Operator norm convergence for sequence of matrices and application to QIT*. - Quantum Marginals - Newton Institute - Cambridge.
(114) **October 2013** . - Geometry Seminar - Tohoku.

(115) **4 September 2013** *Free compression norms and Lp norms*. - New mathematical directions for quantum information - Newton Institute - Cambridge.
(116) **22 May 2013** *Free compression norms and $L_p$ norms*. - Intensive Month on Operator Algebra and Harmonic Analysis - Madrid.
(117) **10 May 2013** *Free probability and minimum output entropy in quantum information*. - Workshop on Operator Algebras - for the 80th birthday of Masamichi Takesaki - - Tokyo.
(118) **April 2013** . - operator algebra seminar - TAMU.
(119) **14 March 2013** *Norm convergence for random matrices and applications*. - Probability Seminar - Harvard.
(120) **February 2013** *Quantum information, free probability and random matrices*. - Colloquium - St John's.
(121) **31 January 2013** *Random matrices, free probability and quantum information theory*. - Quantum Information Theory talk - Perimeter Institute - Waterloo (Canada).
(122) **11 January 2013** *Norm convergence of unitary random matrix models and quantum information theory*. - AMS - San Diego.
(123) **15 November 2012** *Random matrices, free probability and quantum information*. - Geometry Seminar - Tohoku University - Sendai (Japan).
(124) **24 October 2012** *Mouvements browniens non commutatifs*. - Séminaire d'Analyse Harmonique Non Commutative - Université de Caen (France).
(125) **October 2012** . - probability seminar - Rennes (France).
(126) **17 September 2012** *Liberation of projections*. - Minisymposium on Free Probability and Random Matrices - DMV meeting, free probability session - Saarland University - Saarbrucken (Germany).
(127) **3 September 2012** *Free probability techniques in quantum information theory*. Workshop on Quantum Probabilistic Symmetries - Aberystwyth (UK).
(128) **September 2012** *Free probability and QIT*. - talk - inauguration du pole d'excellence - Lille (France).
(129) **July 2012** *Random matrices, free probability and quantum information theory*. - colloquium - RMT and statistics - Minneapolis (US).
(130) **June 2012** . - colloquium - Leipzig.
(131) **16 May 2012** *Non-Commutative Brownian Motion*. - Probabilistic Methods in Quantum Mechanics - University Claude Bernard Lyon 1 - Lyon (France).
(132) **21 April 2012** . - quantum information seminar - ETH Zurich.
(133) **10 April 2012** *Matrices aléatoires et information quantique*. - Séminaire de Probabilités-Statistiques - Laboratoire de Mathématiques de Versailles - Versailles.
(134) **21 March 2012** *Norm convergence for unitary random matrices*. - EPSRC Symposium Workshop - Interacting particle systems, growth models and random matrices - University of Warwick - Coventry (UK).
(135) **March 2012**. RMT and free probability theory - Berkeley.
(136) **March 2012***quantum symmetries*. quantum symmetries workshop - Aberystwyth (UK).
(137) **February 2012** *Random quantum channels*. Operator structures in quantum information theory - Banff International Research Station - Banff (Canada).
(138) **February 2012** . - seminaire de probabilites - Toulouse (France).
(139) **15 January 2012** . - CIRM - Marseille (France).
(140) **15 November 2011** . - Operator Algebra seminar - Cheongju (Korea).
(141) **November 2011** . - OA/FA meeting - Okinawa (Japan).
(142) **25–28 October 2011** *Applications of Random Matrix Theory to Quantum Information Theory*. - Operator Algebras and Mathematical Physics - Kansai seminar house - Kyoto.
(143) **12 October 2011** *New results in Free Probability theory and applications to Quantum Information theory*. - colloquium - RIMS - Kyoto.
(144) **21 April 2011** *Random matrices, representations of $GL(n)$ and free probability of higher order*. - Large N-limit of random multi-matrix systems, von Neumann algebras and free probability - ESI - Wien.
(145) **1 April 2011** . - RMT/stats conference - Minneapolis.
(146) **21 January 2011** *Computational Approach to Mathematical Problems - Riemann Hypothesis*. - JFFoS - Tokyo.
(147) **November 2010** *Random matrix theory and quantum information theory*. - Mittag-Leffler Institut - Stockholm.

(148) **24 November 2010** *Quantum Information Theory*. - seminar of Operator Algebras - Copenhagen.
(149) **21 October 2010** *Free probability and entropy additivity problems for Quantum information theory*. - operator algebra seminar - Tokyo.
(150) **27 September 2010** *Courses on quantum groups, free probability and non-commutative geometry*. - Groupes quantiques et géométrie non commutative - CIRM - Marseilles - France.
(151) **September 2010** . - Luminy.
(152) **16 September 2010** *Higher order freeness and asymptotic representations of unitary groups*. - Seminar on Asymptotic Representation Theory - Nagoya.
(153) **6 September 2010** *Higher order freeness and asymptotic representations of unitary groups*. - Stochastic Processes and Their Applications - SPA - Osaka.
(154) **September 2010** *Eigenvalues of vectors in a random subspace*. OA seminar - Tokyo.
(155) **September 2010** . - conference - Osaka.
(156) **31 August 2010** *Spectral properties of generators of $A_o(n)$*. - QUANTUM GROUPS - Clermont.
(157) **15 July 2010** *Random permutation matrices and sofic groups*. - Workshop on Groups and Group Actions in Operator Algebra Theory - Fields - Ottawa.
(158) **June 2010** . - Banff.
(159) **June 2010** . - journees de Cergy - Cergy.
(160) **1–4 June 2010** *Random Matrix Theory and Quantum Information Theory*. - Conference on Random Matrices - Paris 6.
(161) **8 March 2010** *Free Probability and Quantum Information Theory*. - $C^*$-Algebren - Mathematical Research Institute of Oberwolfach - Oberwolfach - Germany.
(162) **26 February 2010** . - operator algebra seminar - University of Waterloo.
(163) **4 February 2010** *Free Probability and Quantum Information Theory*. - Free Probability and Large N Limit, II - UCLA.
(164) **28 November 2009** *Free probability and quantum information theory*. - Cryptography and Quantum Information - McGill University - Montreal.
(165) **20 November 2009** *Free probability theory and quantum information theory*. - Colloquium - Queen's University.
(166) **28 October 2009** *Free probability theory and quantum information theory*. - Colloquium - Toronto University.
(167) **9 July 2009** *Random quantum channels: almost sure confinement of the eigenvalues*. - Workshop on Operator Structures in Quantum Information - Fields - Toronto.
(168) **30 June – 2 July 2009** *Modèles de matrices pour des groupes quantiques. Les Matrices Aléatoires de GranMa*. - ANR Granma meeting - Lyon.
(169) **11 June 2009** . - Luminy - Marseille.
(170) **5 June 2009** *Random matrix models arising from quantum information theory and applications*. - 41 Symposium on Mathematical Physics - Nicolaus Copernicus University - Torún.
(171) **3 June 2009** . operator algebra seminar, Wroclaw (P. Sniady, M. Bozejko).
(172) **26–30 May 2009** *Some geometric and probabilistic properties of the free quantum groups*. - Canadian Operator Symposium - Regina.
(173) **15 May 2009** *Connes embedding property for $A_o(n)$ and $A_s(n)$*. - Quantum Group Workshop - Toulouse (co-organizer, ANR meeting galoisint).
(174) **6 May 2009** *Matrix approximation in non-commutative probability, representation theory and Schubert calculus*. - analysis seminar - Wroclaw (P. Sniady, M. Bozejko).
(175) **5–6 March 2009** . - asymptotic analysis seminar - Nagoya.
(176) **10 February 2009** . - Kyushu (Y. Ueda).
(177) **2 February 2009** *quantum information and graphical calculus*. - quantum information seminar - Sendai (F. Hiai).
(178) **24 January 2009** . - Kyoto operator algebra seminar - Kyoto.
(179) **17 December 2008** *Some geometric and probabilistic properties of the free quantum group $A_o(n)$*. - Operator Algebras Seminar - Tokyo.
(180) **4 December 2008** . TAMU.
(181) **13 November 2008** . - operator algebra seminar - Goettingen (A. Thom).

(182) **10 November 2008** *Free Bessel laws and new examples of liberated quantum groups*. - Workshop Operator Algebraic Aspects of Quantum Groups - ERC meeting - Leuven (S. Vaes).
(183) **24 October 2008** *On the spectral measure of the sum of elements in a finite von Neumann algebra*. - Tokyo university colloquium.
(184) **25–27 September 2008** *Quantum groups and quantum probability*. - Saskatoon colloquium (S. Belinschi).
(185) **23 September 2008** *Convergence of unitary matrix integrals*. - Stochastics and Statistics Seminar - MIT.
(186) **14–16 September 2008** *Convergence of Unitary and Orthogonal Matrix integrals*. - Erlangen DMV meeting (M. Stolz).
(187) **1–5 June 2008** *On the spectral measure of the sum of elements in a finite von Neumann algebra*. - Non-Commutative Geometry and K-Theory for Operator Algebras - 2nd France-Canada - Montreal (G. Elliott).
(188) **20–24 May 2008** . - Canadian Operator Symposium - Fields workshop - University of Toronto (M. Neufang).
(189) **12–16 May 2008** . - Topological Methods in Algebra, Analysis and Dynamical Systems - Fields workshop - Nipissing (Murat Tuncali).
(190) **May 2008** - CMS meeting - OA - Fields institute - Toronto - (A. Toms).
(191) **5 April 2008** *Some probabilistic and topological properties of the free quantum orthogonal group* $A_o(n)$. - AMS meeting - Bloomington.
(192) **February 2008** . - probability seminar - Toulouse (T. Banica F Barthe).
(193) **14 February 2008** *Weingarten calculus and combinatorics of free probability*. - Journées Groupes Quantiques - ANR workshop - Strasbourg (C. Kassel).
(194) **14 January 2008** *Free Bessel laws*. - Free Probability, Extensions, and Applications - Banff (R. Speicher).
(195) **December 2007** . - Kansai OA seminar - Kyoto.
(196) **18 September 2007** *Weingarten calculus on enveloping algebras and non-commutative random matrices*. - Workshop on Free Probability, Random Matrices, and Planar Algebras - Fields - Toronto - Operator algebra semester. Video.
(197) **September 2007** . - Quantum Probability and Related Topics - CIMAT - Guanajuato.
(198) **13–24 August 2007** . - Summer School in Operator Algebras - Fields - Ottawa (I co-organized it).
(199) **10–17 July 2007** *A linearization theorem for non-commutative probability spaces and applications to Connes embeddability conjecture*. - concentration week in Free Probability - College Station TAMU.
(200) **25–29 June 2007** *Some probabilistic aspects of quantum groups*. - Meeting on noncommutative Lp spaces - CIRM.
(201) **14 June 2007** *A linearization theorem for non-commutative probability spaces and applications to Connes embeddability conjecture*. - Free Probabilities, Operator Spaces and von Neumann Algebras - Sibiu.
(202) **4 May 2007** *A linearization theorem for non-commutative probability spaces and applications to the Connes*. Interactions between Probability and Functional Analysis - Fields - Carleton University - Ottawa.
(203) **28 March 2007** *Convergence of unitary matrix integrals*. - Free Probability and Large N Limit - UC Berkeley.
(204) **February 2007** . - College Station.
(205) **January 2007** . - Ottawa.
(206) **December 2006** . - Tokyo.
(207) **11 December 2006** *Convergence of unitary matrix integrals*. - Probabilistic Methods in Analysis and Algebra - CMS Winter Meeting - Toronto.
(208) **November 2006** . - Goettingen.
(209) **2 November 2006** *Convergence of unitary matrix integrals*. - Random Matrices - CIRM Luminy (Arno Kuijlaars and Michel Ledoux).
(210) **29 September – 5 October 2006** *Convergence of unitary matrix integrals*. - 9th Workshop: Noncommutative Harmonic Analysis with Applications to Probability - Będlewo.
(211) **September 2006** . - Cork.
(212) **June 2006** . - Wroclaw.
(213) **22 May 2006** *Connes property for quantum groups*. Quantum groups meeting - Toulouse.

(214) **26 April 2006** *Quelques résultats récents sur l'intégrale de Itzykson-Zuber et ses scalings*. - Conférence en probabilité - EPFL - Lausanne.
(215) **April 2006** . - Bochum.
(216) **February 2006** . - Queens.
(217) **February 2006** . - Texas A&M University.
(218) **February 2006** . - University of Illinois at Urbana Champaign.
(219) **February 2006** . - Besancon.
(220) **December 2006** . - Osaka.
(221) **December 2006** . - Kyushu.
(222) **September 2006** . - Sendai.
(223) **June 2006** . - Cork.
(224) **June 2006** . - Besancon.
(225) **May 2006** . - Wroclaw.
(226) **April 2006** . - Toulouse.
(227) **28 November 2005** *Representation of unitary groups, random matrix theory and free probability* - Seminar, Kyushu.
(228) **November 2005** . - Seoul (Yonsei).
(229) **6–10 june 2005** *Itzykson-Zuber integral and Voiculescu's R-transform*. - Workshop on Operator algebras, Operator spaces and Noncommutative Probability - Paris 6.
(230) **27 March – 2 April 2005** *Free probability*. - MFO Oberwolfach (P. Biane, R. Speicher, D. Voiculescu).
(231) **15 March 2005** . - Ottawa university Colloquium.
(232) **15 February 2005** . - Case Western reserve - Colloquium.
(233) **8 February 2005** *Higher order freeness*. - AQ seminar - Sendai (N. Obata, F. Hiai).
(234) **10–14 January 2005** *Braid Groups, Clusters and Free Probability*. - Palo Alto, AIM.
(235) **9–14 October 2004** *Free probability and Jacobi ensembles*. - Free probability - Banff (Nica, Speicher, Voiculescu) - ppower4.
(236) **10 September 2004** *Development of the limit of the IZ integral close to zero*. - Sendai (F. Hiai).
(237) **27 August 2004** *An introduction to map enumeration via matrix integrals*. - Junior (Ueda).
(238) **2–6 August 2004** . - Free probability workshop (Dykema, Pisier).
(239) **18-21 May 2004** *Integration over classical compact groups with applications to free probability and matrix integrals*. - Warwick, UK O'Connell - ppower4.
(240) **12 May 2004** *Integration over classical compact groups with applications to free probability and matrix integrals*. - Kyoto operator algebra seminar.
(241) **5 March 2004** . - Seminar of operator algebra, Tokyo university (Y. Kawahigashi).
(242) **16 February 2004** . - Aoba Seminar (N. Obata).
(243) **19 December 2003** *Unitary integration, matrix integrals and free probability*. - Seminar of operator algebra, Tohoku university (F. Hiai).
(244) **17 December 2003** *Free probability and classical modified matrix ensembles*. .
(245) **17 November 2003** *Free probability and Jacobi ensembles*. - Workshop operator algebra/functional analysis - Nagoya (T. Natsume).
(246) **13 November 2003** *Free probability and matrix integrals*. - Seminar of operator algebra, Tokyo university (Y. Kawahigashi).
(247) **27 October 2003** *Quantum Martin boundary*. - Seminar of operator algebra, Kyushuu university (Y. Ueda, T. Hayashi).
(248) **27 October 2003** *Free probability and universality results for modified Jacobi ensembles*. - Seminar of analysis, Kingston university (R. Speicher).
(249) **14 October 2003** *Integration on compact groups and free probability*. - Seminar of mathematics, Waterloo university (A. Nica).
(250) **19 September 2003** *Random matrices and free probability*. - Kyoto university, seminar of probability (Yoshida).
(251) **9 September 2003** *Free probability and Jacobi ensembles*. - Journees de probabilites (M. Ledoux et al), invited conference.

(252) **9 July 2003** *Projecteurs aleatoires, ensembles de Jacobi, probabilites libres*. - workshop GdR algebres d'operateurs (S. Vassout, E. Germain).
(253) **25 June 2003** *Free probability and Itzykson-Zuber integral*. - Kyoto, Kansai operator algebra seminar (M. Izumi).
(254) **28 May 2003** *Quantum Martin Boundary*. - Kyoto, operator algebra seminar (M. Izumi).
(255) **30 April 2003** *Modified Jacobi ensembles and free probability theory*. - Katholieke universiteit leuven (A. Kuijlaars).
(256) **22 January 2003** *Itzykson-Zuber type integrals and free probability*. - Workshop IHP random growth (J-B Zuber, G. Schaeffer, W. Werner).
(257) **9 January 2003** *Itzykson-Zuber type integrals and free probability*. - Workshop random matrices - Sandbjerg Manor, Denmark (U. Haagerup, S. Thorbjornsen).
(258) **6 December 2002** *Matrices aleatoires et probabilites libres*. - Seminaire de probabilites de Toulouse.
(259) **5 December 2002** *Integration sur le groupe unitaire*. - Seminaire de probabilites de Toulouse.
(260) **10 August 2002** *A combinatorial approach to the IZ integral and free probability*. - PIMS Vancouver (Pisier, Szarek).
(261) **30 April 2002** *Convergence d'integrales de type Itzykson-Zuber*. - Aussois colloque jeunes probabilistes.
(262) **4 March 2002** *rencontre groupement de recherche algebre d'operateurs*. - CIRM.
(263) **20 March 2001** *une approche combinatoire de l'integrale de IZ, II*. - GdT Paris 6 (Pisier).
(264) **13 March 2001** *une approche combinatoire de l'integrale de IZ, I*. - GdT Paris 6 (Pisier).
(265) **25 August 2000** *Quantum Martin boundary*. - workshop Wroclaw (Bozejko).
(266) **15 June 2000** *Quantum Martin boundary*. - GdT Paris 6 (Pisier).

## Mini-courses

**July 2024** An invitation to Weingarten calculus, research school lecture series (English, CIRM)
**November 2023** Intensive course on Weingarten calculas (English, Nagoya University)
**October 2022** Intensive course on Random Matrices (Japanese, Kyushu University)
**June 2022** Around the operator norm convergence of random matrices in free probability, RMMC summer school lecture series (English, Laramie)
**June 2022** Equivariance and positivity, summer school lecture series (English, Bangalore)
**November 2017** Quantum Information theory, intensive course (English, Tokyo)
**November 2017** Random Matrix Techniques in Quantum Information theory, intensive course (English, IHP)
**21-28 April 2017** Free Probability and Applications (CIMPA intensive course, French, Settat, Morocco)
**June 2016** Random Matrix Theory (intensive course, Japanese, Sapporo)
**Fall 2011** intensive course on random matrix theory (Kyoto University)
**Spring 2009** invited series of lectures, Wroclaw.
**Fall 2008** combinatorics of free probability (Tokyo university, graduate course, English)
**Spring 2008** matrix integrals (mini-course at Nipissing university)
**Fall 2007** Weingarten calculus (research course at Nagoya university)

## Teaching

**Fall 2022** Linear Algebra B (English, Kyoto)
**Fall 2022** Topics Analysis II - Random Matrix Theory (Japanese, Kyoto)
**Spring 2022** Honors Mathematics B (English, Kyoto)
**Spring 2022** Linear Algebra A (English, Kyoto)
**Fall 2021** Linear Algebra B (English, Kyoto)
**Spring 2021** Honors Mathematics B-E2 (English, Kyoto)
**Spring 2021** Linear Algebra with Exercises A (English, Kyoto)
**Spring 2020** Topics in Analysis F (Japanese, Kyoto)
**Spring 2020** Honors Mathematics B-E2 (English, Kyoto)
**Spring 2020** Linear Algebra with Exercises A (English, Kyoto)

**Fall 2019** Honors Mathematics A (English, Kyoto)
**Fall 2019** Linear Algebra B (English, Kyoto)
**Spring 2019** Linear Algebra A (English, Kyoto)
**Fall 2018** Honors Mathematics A (English, Kyoto)
**Fall 2018** Linear Algebra B (English, Kyoto)
**Spring 2018** Honors Mathematics B (English, Kyoto)
**Spring 2018** Linear Algebra A (English, Kyoto)
**November 2017** Quantum Information theory, intensive course (English, Tokyo)
**Spring 2017** Honors Mathematics B (English, Kyoto)
**Spring 2017** Linear Algebra A (English, Kyoto)
**Fall 2016** Honors Mathematics A (English, Kyoto)
**Fall 2016** Topics Analysis II - Random Matrix Theory (Japanese/English, Kyoto)
**June 2016** Random Matrix Theory (intensive course, Japanese, Sapporo)
**Spring 2016** Linear Algebra A (English, Kyoto)
**Fall 2015** Honors Mathematics A (English, Kyoto)
**Fall 2015** Linear Algebra B (English, Kyoto)
**Spring 2015** Linear Algebra A (English, Kyoto)
**Fall 2014** Honors Mathematics A (English, Kyoto)
**Winter 2014** Analyse complexe (French, Ottawa, MAT3521)
**Winter 2014** Introduction à l'analyse (French, Ottawa, MAT1725)
**Winter 2013** Introduction à l'analyse (French, Ottawa, MAT1725)
**Fall 2011** Intensive course on random matrix theory (Kyoto University)
**Winter 2011** Analyse II (French, Ottawa, MAT2521)
**Spring 2010** Calcul différentiel et intégral II (French, Ottawa, MAT1722)
**Spring 2010** Analysis II (English, Ottawa, MAT2121)
**Fall 2009** Introduction a l'algèbre linéaire appliquée (French, Ottawa, MAT2742)
**Fall 2009** Real Analysis I (English, Ottawa, MAT4125/5125)
**Fall 2008** Combinatorics of free probability (Tokyo university, graduate course, English)
**Winter 2008** Introduction à l'algèbre linéaire (French, Ottawa MAT1741)
**Fall 2007** Measure theory (English, Ottawa MAT5125)
**Fall 2007** Linear algebra (English, Ottawa MAT2141)
**Winter 2007** Analyse complexe (French, Ottawa MAT3521)
**2002-2003** Quantum calculus (ENS students seminar)
**2001-2002** Towers of algebras (ENS students seminar)
**2001-2003** Preparation of "agrégation de mathematiques" oral examination (ENS Paris)
**2000-2001** Analyse complexe (TA, ENS Paris)
**1996-1999** Interrogation sessions in "Classes préparatoires" at Lycees Louis-le-Grand and Saint-Louis
**1996-2003** private tutoring in mathematics

## Research and Graduate supervision

**PhD students:**

**PhD, Kyoto:** Ms. Manasa Nagatsu (2026/04 – now)
**PhD, Kyoto:** Mr. Yu Kitagawa (2025/04 – now)
**PhD, Kyoto:** Mr. Akihiro Miyagawa (2021/04 – 2024/03)
**PhD, Kyoto:** Mr. Junichiro Matsuda (2021/04 – 2024/03)
**PhD, Kyoto:** Mr. Mathieu Fevre (2018/04 – 2021/03) [unfinished – placement: high school teaching]
**PhD, Kyoto:** Mr. Felix Parraud (2018/10 – 2021/09) [joint supervision with Alice Guionnet at ENS Lyon]
**PhD, Kyoto:** Ms. Gunjan Sapra (2015/10 - 2019/03) [placement: postdoctoral fellow at ISI Bangalore]
**PhD, Kyoto:** Ms. Sushma Kumari (2015/10 - 2018/09) [placement: assistant professor at Musashino University]
**PhD, uOttawa:** Mr. Chadi Hamzo (2012/09 - 2018/05) [placement: consulting, Toronto area]

**PhD, uOttawa:** Mr. Timothy Cioppa (2012/01 - 2017/01) [unfinished – placement: developper Toronto Area]
**PhD, uOttawa:** Ms. Muneerah Al Nuwairan (2009/09 - 2015/01) [placement: assistant professor KSA]
**PhD, uOttawa:** Ms. Nadia Saad (2008/01 - 2012/12) [placement: assistant professor Cairo]
**PhD, uOttawa:** Ms. Termeh Kousha (2007/09 - 2011/12) [placement: teaching professor uOttawa]

**MSc students:**

**MSc, Kyoto:** Mr. Kunitaka Iwata (2026/04 – now)
**MSc, Kyoto:** Mr. Shunki Maekawa (2026/04 – now)
**MSc, Kyoto:** Mr. Yuta Yamagishi (2026/04 – now)
**MSc, Kyoto:** Ms. Manasa Nagatsu (2024/04 – 2026/03)
**MSc, Kyoto:** Mr. Kento Satou (2022/04 – 2026/03)
**MSc, Kyoto:** Mr. Nao Tomita (2022/04 – 2025/03)
**MSc, Kyoto:** Mr. Kohki Iba (2022/04 – 2022/09)
**Graduate Internship:** Ms. Lamia Lamrani (2019/06 – 2019/08)
**MSc, Kyoto:** Mr. Akihiro Miyagawa (2019/04 – 2021/03) [placement: PhD student Kyoto U]
**MSc, Kyoto:** Mr. Junichiro Matsuda (2019/04 – 2021/03) [placement: PhD student Kyoto U]
**M2 (foreign student), Kyoto:** Mr. Mathieu Fevre (2016/08 – 2017/07) [placement: PhD student Kyoto U]
**MSc, Kyoto:** Mr. Yuki Ueda (2015/04 – 2017/03) [placement: PhD student Hokkaido]
**MSc, Kyoto:** Mr. Katsushi Fujiwara (2015/04 – 2017/03) [placement: high school teacher Kansai]
**MSc:** Mr. Samuel Buteau (2014/09 – 2016/08) [placement: PhD student Dalhousie]
**MSc:** Mr. Pierre Yves Gaudreau Lamarre (2013/09 – 2015/08) [placement: PhD student Princeton]
**MSc, uOttawa:** Mr. Timothy Cioppa (2010/01 – 2011/12) [placement: PhD student uOttawa]

**Undergraduate studies/internships:** [all students mentioned below who terminated studies under my supervision moved to graduate studies subsequently]

**4th-seminar, Kyoto:** Mr. Akihiro Miyagawa (2018/04 – 2019/03)
**4th-seminar, Kyoto:** Mr. Junichiro Matsuda (2018/04 – 2019/03)
**4th-seminar, Kyoto:** Mr. Ryuta Namise (2018/04 – 2019/03)
**4th-seminar, Kyoto:** Mr. Kazuto Zenno (2018/04 – 2019/03)
**Undergraduate Internship:** Mr. Alexander McDonald (2015/01 – 2015/03)
**Undergraduate Internship:** Mr. Alexander McDonald (2013/06 – 2013/08)
**Undergraduate Internship:** Mr. Pierre Yves Gaudreau Lamarre (2013/04 – 2013/06)
**Undergraduate Internship:** Mr. Samuel Buteau (2013/04 – 2013/06)
**USRA Internship:** Mr. Samuel Buteau (2013/01 – 2013/04)
**USRA Internship:** Mr. Pierre Yves Gaudreau Lamarre (2011/05 – 2011/06)
**Mitacs Globalink fellowship:** Mr. Gaurav Sinha (2010/05 - 2010/07)
**NSERC USRA:** Mr. Timothy Cioppa (2008/04 – 2008/07)
**Internship, Lyon 1:** Mr. Julien Poisat (2006/04 – 2006/06)

**Postdoctoral fellowships** (note: placement stated whenever known):

**JSPS PD, Kyoto:** Mr. Katsunori Fujie (2024/04 – 2026/03)
**JSPS PD, Kyoto:** Mr. Junichiro Matsuda (2024/04 – 2025/03)
**Postdoctoral fellow:** Dr. Sheng Yin (2021/11 – 2022/07)
**Postdoctoral fellow:** Dr. Saeid Molladavoudi (2017/03 – 2018/06) [placement: analyst Statistics Canada]
**Postdoctoral fellow:** Dr. Charles Starling (2015/03 – 2016/06) [placement: assistant professor Carleton, Canada]
**Postdoctoral fellow:** Dr. Carlos Gonzales-Guillen (2015/01 – 2015/06) [placement: assistant, UCM Madrid, Spain]
**FO postdoc uOttawa / Carleton:** Dr. Sutanu Roy (2014/01 – 2016/04) [placement: assistant professor NISER, India]
**Postdoctoral fellow, uOttawa:** Dr. Robin Langer (2014/01 – 2014/06)

**Postdoctoral fellow, uOttawa:** Dr. Camille Male (2013/09 – 2014/06) [placement: CNRS researcher, France]
**Postdoctoral fellow, uOttawa:** Dr. Steve Avsec (2013/01 – 2013/08) [placement: law firm, US]
**Postdoctoral fellow, uOttawa:** Dr. Nadia Saad (2013/01 – 2013/06) [placement: assistant professor Cairo, Egypt]
**Postdoctoral fellow, uOttawa:** Dr. Adam Sierakowski (2012/01 – 2012/06) [placement: research fellow Wollongong, Australia]
**Postdoctoral fellow, uOttawa:** Dr. Termeh Kousha (2012/01 – 2012/06) [placement: teaching professor uOttawa]
**FO Postdoctoral fellows:** Dr. Deping Ye (2010/07 – 2011/07) [placement: associate professor Memorial University, Canada]
**Postdoctoral fellow, uOttawa:** Dr. Ion Nechita (2009/07 – 2011/08) [placement: CNRS researcher, France]
**Postdoctoral fellow, uOttawa:** Dr. Richard Burstein (2008/09 – 2009/08)

## Leadership

**Organization of long term programs:**
2021: co-organizing a RIMS one year Program on the theory of operator algebras and its applications (April 2021 – March 2022, with N. Ozawa, M. Izumi, Y. Kawahigashi, H. Matui, Y. Ueda)
2019: co-organization of a one month CRM program (Montreal), New Developments in Free Probability and Applications (1–31 March 2019, with James Mingo, Roland Speicher and Dan Voiculescu)
2017: co-organization of an IHP trimester (Paris) on Analysis in Quantum Information Theory (T3-2017, 4 September – 15 December 2017, with Guillaume Aubrun, Ion Nechita and Staszek Szarek)
2013: co-organization a Fields thematic program (July 2013, with S. Belinschi, J. Mingo, A. Nica, R. Speicher, D. Voiculescu)

**Conference organization:**
2027 co-organization of Random Tensors and Related Topics (3rd edition), IESC, Cargèse, Corsica (11–17 April 2027, with Stéphane Dartois, Cécilia Lancien, Luca Lionni)
2026 co-organization of the Conférence en l'honneur de Philippe Biane, Sorbonne Université, Paris (19–23 October 2026, with Natasha Blitvic, François Chapon, Valentin Féray, Pierre-Loïc Méliot, Pierre Tarrago)
2026 co-organization of a Workshop on Random Matrix Theory at the Tianyuan Mathematical Center, Kunming, China (16-22 August 2026, with Zhigang Bao, Jeff Yao, Dong Yao)
2026 co-organization of the 18th International Symposium on Orthogonal Polynomials, Special Functions and Applications (OPSFA-18), Doshisha University, Kyoto (17-21 August 2026)
2026 member of the steering committee of the China–Japan–Korea Conference on Functional Analysis 2026, University of Tokyo (29 June – 3 July 2026)
2026 co-organization of the kickoff meeting on Noncommutative Probability and SPDE (NC-SPDE), Kyoto University (15 June 2026, with N. Sakuma)
2026 co-organization of Non-commutative Probability, Random Matrices and Lévy Processes 2026 (NPRML2026), University of Osaka (16–18 March 2026)
2025 co-organization of the workshop "Randomness, Invariants, and Complexity" at the Simons Institute, Berkeley (17–21 November 2025, with Peter Bürgisser, Rafael Mendes de Oliveira, Michael Walter)
2025 co-organization of the Random Matrix Theory Summer School in Japan 2025 (Kyoto University, 8–12 September 2025, with Reika Fukuizumi and Tomoyuki Shirai)
2024 holder of the Chaire Jean Morlet at CIRM, Marseille — semester programme on random matrices, representation theory and quantum information (2nd semester 2024, local project leader Nizar Demni)
2024 co-organization of a program on Random Tensors and Related Topics at IHP, Paris (30 September – 18 October 2024, with Stéphane Dartois, Cécilia Lancien, Luca Lionni)
2024 scientific committee of the French–Japanese Conference on Probability & Interactions at IHES (6–8 March 2024)
2023 co-organization of the Workshop on Operator Algebras and Applications: Free Probability at the

Fields Institute, Toronto (13–17 November 2023, with James Mingo, Dimitri Shlyakhtenko, Paul Skoufranis)
2023 scientific committee of the Shenzhen Conference on Random Matrix Theory and Applications, CUHK-Shenzhen (26–30 June 2023)
2023 co-organization of Random Matrices and Applications, a workshop of RIMS Project Research 2023 "Stochastic Processes and Related Fields", RIMS, Kyoto (5–9 June 2023, with C. Donati-Martin, N. Sakuma, T. Shirai, O. Zeitouni)
2022 co-organization of a workshop on Non-Commutative Probability at RIMS, Kyoto (22–24 June 2022, with N. Ozawa and N. Sakuma)
2021 scientific organizing committee of the CMS 75th+1 Anniversary Summer Meeting (University of Ottawa, held online 7–11 June 2021; scientific directors A. Fraser, M. Nevins, M. Šajna)
2020 advisory committee of the 4th Bangkok Workshop on Discrete Geometry, Dynamics and Statistics (January 2020, main organizer Oleg Evnin)
2019 co-organization of Interactions between commutative and non-commutative probability, a French-Japan meeting in Kyoto (19–23 August 2019, with Takahiro Hasebe, Noriyoshi Sakuma, Kouji Yano)
2019 co-organization of MAQIT, Seoul National University (20–24 May 2019, with Joonwoo Bae, Seung-Hyeok Kye, Hun Hee Lee and Soojoon Lee)
2018 main organizer of Random matrices and their applications in Kyoto (21–25 May 2018, with Djalil Chafaï, Jamal Najim, Hirofumi Osada, Tomoyuki Shirai)
2016 co-organization of MAQIT, NIMS, Daejeon (15–19 February 2016, with Hun Hee Lee and Seung-Hyeok Kye)
2016: co-organization of a conference (uOttawa, 30 May - 1 June 2016, with T. Giordano, V. Pestov)
2015: co-organization of a workshop on Quantum Information, *Boole and Beyond in Quantum Information Theory* (University College Cork, 17–20 August 2015, with M. Christandl and C. Köstler)
2015: co-organization of a Fields workshop (Herstmonceux, 13-17 July 2015, with J. Mingo, A. Montanaro, G. Viola, M. Weber)
2015: co-organization of a Fields workshop (uOttawa, 5-7 February 2015, with T. Giordano, S. Roy)
2013: co-organization of a CMS winter meeting session (Ottawa, 6-9 December 2013, with M. Kalantar, M. Kennedy, T. Giordano)
2013: co-organization of a Fields Focus Program on Noncommutative Distributions in Free Probability Theory (July 2013, with S. Belinschi, J. Mingo, A. Nica, R. Speicher, and D. V. Voiculescu)
2012: co-organization of a CMS summer meeting session (Regina, 1-4 June 2012, with S. Belinschi)
2010: co-organization of a Fields extended workshop on Groups and Group Actions in Operator Algebra Theory (uOttawa, 12-16 July 2010, with T. Giordano, V. Pestov)
2010: co-organization of a workshop on Random Matrix Techniques in Quantum Information Theory at the Perimeter Institute, Waterloo, co-sponsored by the Fields Institute (4–6 July 2010, with P. Hayden and I. Nechita)
2009: co-organization of an ANR quantum group meeting (Toulouse, 14–16 May 2009, with T. Banica, J. Bichon and C. Kassel)
2008: co-organizing the CMS Winter meeting Operator Algebra session (Ottawa, 5-8 December 2008, with T. Giordano)
2008: main organizer of a Fields workshop around Connes Embedding Problem (Ottawa, 16-18 May 2008)
2007: co-organizing the Fields operator algebra summer school (uOttawa, 13-24 August 2007, with T. Giordano, D. Handelman, V. Pestov)

**Seminar organization:**
Catch-all Mathematical Colloquium of Japan, organizer (Fall 2021 – March 2024);
Kyoto University Mathematics Colloquium, organizer (Spring 2019);
Kyoto Operator Algebra seminar, organizer (2014-present);
uOttawa analysis seminar (2007-2014);

**Committee Membership** (departmental committees omitted):

2013/3 – 2014/4: Head of the selection panel for all NSERC grant applications in mathematics in Canada (evaluation group 1508, NSERC Discovery Grant)
2012/2–2012/6: External Committee Member, Associate professor hiring committee, Université de Franche-Comté
2011/1 - 2013/3: Committee Member, NSERC Discovery Grant, Natural Sciences and Engineering Research Council of Canada
2010/10 – 2012/7 Romanian Innovation Council Committee Member
2010–2011: Committee Member, Bourses de recherche postdoctorale, Fonds de recherche du Québec - Nature et technologies (FRQNT), Canada

**Journal Refereeing** (alphabetical order, multiplicity omitted):

(1) Acta Mathematica
(2) Advances in Mathematics
(3) ALEA
(4) Analysis & PDE
(5) Annales de l'Institut Henri Poincaré B
(6) Annales de l'Institut Henri Poincaré D
(7) Annales Scientifiques de l'Ecole Normale Supérieure
(8) Annals of Applied Probability
(9) Annals of Probability
(10) Annals of Statistics
(11) Astérisque
(12) Bedlewo proceedings
(13) Bernoulli
(14) Bulletin des Sciences Math.
(15) Bulletin of the LMS
(16) Communications in Algebra
(17) Communications in Mathematical Physics
(18) Communications on Pure and Applied Mathematics
(19) Conference on Formal Power Series and Algebraic Combinatorics
(20) Crelle's journal
(21) Compositio
(22) Discrete Mathematics
(23) Documenta Mathematica
(24) Duke Mathematical Journal
(25) Electronic Communications in Probability
(26) Electronic Journal of Combinatorics
(27) Electronic Journal of Probability

(66) Transactions on mathematical software

**Book Refereeing:**
Oxford University Press
Springer Briefs
Springer Theoretical and Mathematical Physics

**Grant Refereeing** (note: most items are counted without multiplicity)
ARIS Slovenia
ISF (Israel Science Foundation)
SNF (Swiss national science foundation)
Research Foundation Flanders (FWO)
MAESTRO and SONATA grant scheme of the Polish National Science Centre
European Research Council starting, consolidator and advanced grants (referee)
Agence de la Recherche, France (referee)
NSERC discovery grants and Canadian Research chairs
BIRS workshop proposals
Fields semester proposals
BIRS proposals
MFO proposals
Mittag-Leffler Proposals

**PhD theses:**
I was examiner and committee member of the following PhD defences:
*Analyse et probabilité sur les groupes quantiques (localement) compacts et les groupes duaux*, Isabelle Baraquin under Uwe Franz at Université Franche Comté, June 2019;
*Homological Manifestation of Quantum Group duality*, Jason Crann under Matthias Neufang at Carleton University, August 2015
*Schur-Weyl Duality, Brownian motion on classical compact Lie groups and asymptotic study of Yang-Mills measure*, Antoine Dahlqvist under Thierry Lévy at LPMA, Paris 6, Fall 2013;

*Actions of Finite Groups on Substitution Tilings and Their Associated C*-algebras*, Charles Starling under Thierry Giordano at University of Ottawa, Fall 2011;
*Real Second-Order Freeness and Fluctuations of Random Matrices*, Emily Redelmeier under Jamie Mingo at Queen's University (Canada), August 2011;
*Representation theory of compact inverse semigroups*, Wadii Hajji under Benjamin Steinberg and David Handelman at University of Ottawa, July 2011;
*Towards Harmonic Analysis on Locally Compact Quantum Groups From Groups to Quantum Groups – and Back*, Mehrdad Kalantar under Matthias Neufang at Carleton University, fall 2010
*Gelfand-Cetlin patterns*, Tony Metcalfe under Neil O'Connell at UCC Cork, July 2009;
*Etats aléatoires, théorie quantique de l'information et probabilités libres*, Ion Nechita under Stéphane Attal at Université Lyon 1, March 2009;
*Actions of xerox type on Araki-Woods factors and their fixed point von Neumann algebras*, Radu Munteanu under Thierry Giordano at University of Ottawa, February 2009;

**Habilitation theses** I was external / committee for the following habilitation diplomas (note: habilitation is a French diploma, typically 5-10 years after PhD, needed for established researchers to become PhD supervisors):
*Approche Probabiliste des Trajectoires Quantiques*, Clément Pellegrini Université Paul Sabatier, 7/12/2018;
*Géométrie de l'intrication quantique*, Guillaume Aubrun Université Lyon 1, 27/3/2017;

## Language skills

I have held academic positions, worked, taught and done administration in French, English and Japanese. Here is a more specific description of my language abilities:

**French:** Native language
**English:** Bilingual working proficiency (read, written, spoken)
**Japanese:** Working proficiency (read, spoken)
**German:** Fluent (read, written, spoken)
